

FITTING INSTRUCTIONS

WHAT YOU WILL NEED...

PHILIPS HEAD SCREW DRIVER OR DRILL

60MM SCREWS  
\*Included\*

35MM SCREWS  
\*Included\*

SCREW CUPS  
\*Included\*

**LARGER BEDS ONLY**

HEADBOARD

Lay down the headboard panels on the floor with the tenons as shown above, and push the rails into the legs.  
*If your bed doesn't have a headboard, repeat steps 3 & 4 instead of 1 & 2.*

Ensure rails and legs are tightly pushed together and insert the screw cups and 60mm screws into each hole.

FOOTBOARD

Lay down the footboard pieces on the floor with the tenons as shown above, and push the rails into the legs.

Ensure the rails and legs are tightly pushed together and insert the screw cups and 60mm screws into each hole.

SIDE PANELS

Push the side panels into the legs of the headboard and footboard, ensuring the supporting bars for the bed slats are on the inside and closest to the top edge. It is often easier to get help with this.

Ensure the rails and legs are tightly pushed together and insert the screw cups and 60mm screws into each hole.

CENTRAL RAIL - LARGER BEDS ONLY

Place the central rail in the middle of the bed, between the footboard and headboard bridging over each support.

Secure down with screw cups and 35mm screws.

SLATS

Place the slats on the frame ensuring they are evenly spaced.

Larger beds also need fixing in the middle to the central rail.

10.

**ADD YOUR MATTRESS AND BEDDING, THEN ENJOY!**

Once you are happy with the position of the slats, fix securely into position with the 35mm screws. No screw cups necessary.

To be used as a guide only. Some beds may have more rails or don't have headboards. If you need any help assembling your bed, please don't hesitate to get in touch with us and we will be happy to help.
